

Industrial Solution

Our energy at your service

Thanks to its **Industrial Solution**, ICE SAS continues to support you in anticipating, defining and achieving your projects.

The priority of our engineering teams is to advise you, and provide customised, innovative and sustainable solutions. Support is available both remotely and on site.

From consulting services through to installation, including training and custom-made projects, our combined offer of products and services is designed to meet all the protection requirements of your electrical network.

OUR TRADEMARKS

ADVICE & DIAGNOSIS

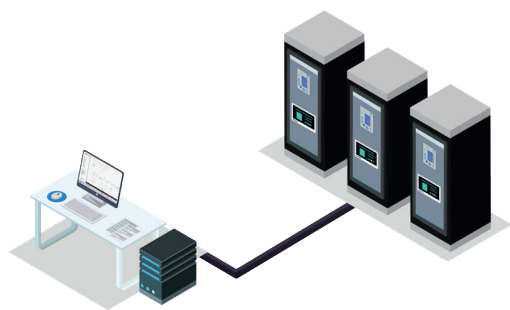

Diagnosis at customers' sites
Design of products according to customers' specifications
Support in purchasing specifications

PRE-STUDIES

Initial protection study
Relay setting file creation
Disturbance analysis
Network event analysis
Casing & cabinet design

PS8000 - SCADA
Supervision system

STUDIES & ENGINEERING

Network studies & final protection study
Sizing studies
Specific product development
Automation - supply & programming
IEC 61850 engineering (cybersecurity & IT)
Assembly and wiring
Integration & casing/cabinet design

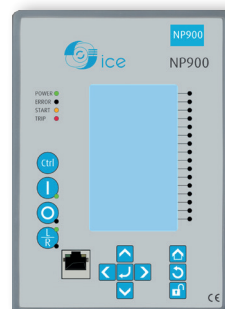

TRAINING

Training on integrated equipment
IEC 61850 and cybersecurity training courses
Training on other subjects (on request)

INSTALLATIONS & ON-SITE INTERVENTIONS

Express deliveries
System commissioning
Factory and Site Acceptance Tests
Maintenance & service contracts including periodic visits
Urgent on-site support
Software update management
Hardware upgrades

NP900 - IEC 61850
Protection relays

AP900
Arc Flash protection

FOLLOW-UP & AFTER-SALES SERVICE

Electrical Network disturbance measurement and analysis
Management of service requests
Helpline (digital with technical file follow-up)
Repairs
